

Position: Environmental Engineer
No of positions: 1
Location: Bay City, Texas
Posting Date: January 17, 2011
Expiration Date: February 17, 2011
Supervisor: Environmental & Laboratory Manager
Category: EHS

Summary of Position:

Provide technical direction and drive compliance and improvement of critical environmental programs in water, wastewater and hazardous waste management & combustion. The candidate must be a self-motivated, hard-working team player who pays attention to details and delivers results. Strong organizational and communication skills are essential. The successful candidate will demonstrate that he or she can take ownership of the job responsibilities and hold themselves accountable for individual and site successes.

Major Activities and Principal Responsibilities:

- Interpret permits and regulations, maintain in-depth knowledge of existing and proposed regulations, implement programs and coordinate with outside agencies as needed for regulatory inspections, permitting functions, release reporting, recordkeeping and compliance activities
- Determine best practices and serve as the technical point of contact for compliance questions
- Provide appropriate coaching and mentoring to ensure the work processes are delivering meaningful business results.
- Demonstrated experience with Hazardous Waste Combustion, RCRA Part B Permits, Hazardous Waste Management, Waste Classifications, DOT, NPDES, RCRA, EPA, CERCLA, and CWA Wastewater Treatment Processes
- Familiarity with Stack Testing, CEMS, HWC MACT (EEE), BIF MACT (DDDDD), C&D Landfill, and Compliance & Discharge monitoring reports, SWPPP, SPCC and a working knowledge of Texas solid waste and wastewater environmental regulations
- Collaborate with internal / external groups to meet monthly, quarterly, and annual reporting requirements including but not limited to Annual Waste Summary, Emission Inventory, TRI, Tier II, SARA, and various other Federal / Texas environmental reporting requirements.
- Coordinate with manufacturing operations to meet environmental expectations, improve and track key compliance metrics and implement programs that achieve regulatory requirements and operational flexibility
- Improve and maintain established environmental management systems including databases, documentation, training programs and internal audit functions for required media (waste, wastewater)
- Direct and review the work of consultants
- Participate in industry associations, peer groups and other organizations to share and learn best practices, build relationships and promote the company's interests;
- Respond to and investigate environmental incidents such as spills, releases, NOVs, and complaints

Required Knowledge/Skills/Abilities:

- BS degree in Environmental Management, Environmental Engineering, Environmental Sciences, Chemistry, or Chemical Engineering
- A minimum of 10 years relevant experience in a chemical or industrial setting
- Demonstrated analytical, communication and negotiations skills
