SAFETY DATA SHEET

Pelargonic acid
10560

SECTION 1: Identification of the substance / mixture and of the company / undertaking

1.1. Product identifier

Identification of the substance/preparation

Pelargonic acid

Chemical Name
Nonanoic acid

CAS-No
112-05-0

EC No.
203-931-2

Registration number (REACH)
01-2119529247-37

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses
Distribution of substance
Formulation
cleaning agent
Lubricants and lubricant additives
Intermediate
laboratory chemicals
Industrial processing of articles

Uses advised against
None

1.3. Details of the supplier of the safety data sheet

Company/Undertaking
OXEA Corporation
1505 West LBJ Freeway, Suite 400
Dallas, TX 75234
USA

Product Information
Product Stewardship
FAX: +49 (0)208 693 2053
e-mail: psq@oxea-chemicals.com

1.4. Emergency telephone number

Emergency telephone number
+44 (0) 1235 239 670 (UK)
available 24/7

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

This substance is classified based on Directive 1272/2008/EC and its amendments (CLP Regulation)

Skin corrosion/irritation Category 2, H315
Serious eye damage/eye irritation Category 2, H319
Environmental hazard Aquatic Chronic 3; H412
SAFETY DATA SHEET

Additional information
For full text of Hazard- and EU Hazard-statements see SECTION 16.

2.2. Label elements
Labelling according to Regulation 1272/2008/EC and its amendments (CLP Regulation).

Hazard pictograms

Signal word  Warning

Hazard statements
H315: Causes skin irritation.
H319: Causes serious eye irritation.
H412: Harmful to aquatic life with long lasting effects.

Precautionary statements
P273: Avoid release to the environment.
P280: Wear protective gloves/protective clothing/eye protection/face protection.
P302 + P352: IF ON SKIN: Wash with plenty of soap and water.
P332 + P313: If skin irritation occurs: Get medical advice/ attention.
P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313: If eye irritation persists: Get medical advice/ attention.

2.3. Other hazards
Vapour/air-mixtures are explosive at intense warming

PBT and vPvB assessment
This substance is not considered to be persistent, bioaccumulating nor toxic (PBT), nor very persistent nor very bioaccumulating (vPvB)

SECTION 3: Composition / information on ingredients

3.1. Substances

<table>
<thead>
<tr>
<th>Component</th>
<th>CAS-No</th>
<th>REACH-No</th>
<th>1272/2008/EC</th>
<th>Concentration (%)</th>
</tr>
</thead>

|                   |         |                | Aquatic Chronic 3; H412 | > 95,5            |

For full text of Hazard- and EU Hazard-statements see SECTION 16.

SECTION 4: First aid measures

4.1. Description of first aid measures
Inhalation
Keep at rest. Aerate with fresh air. When symptoms persist or in all cases of doubt seek medical advice.

**Skin**
Wash off immediately with soap and plenty of water. When symptoms persist or in all cases of doubt seek medical advice.

**Eyes**
Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses. Immediate medical attention is required.

**Ingestion**
Call a physician immediately. Do not induce vomiting without medical advice.

### 4.2. Most important symptoms and effects, both acute and delayed

**Main symptoms**
cough, headache, nausea, shortness of breath.

**Special hazard**
Lung irritation, Lung oedema.

### 4.3. Indication of any immediate medical attention and special treatment needed

**General advice**
Remove contaminated, soaked clothing immediately and dispose of safely. First aider needs to protect himself.

Treat symptomatically. If ingested, flush stomach and compensate acidosis.

---

**SECTION 5: Firefighting measures**

5.1. Extinguishing media

**Suitable extinguishing media**
foam, dry chemical, carbon dioxide (CO2), water spray

**Unsuitable Extinguishing Media**
Do not use a solid water stream as it may scatter and spread fire.

5.2. Special hazards arising from the substance or mixture

Under conditions giving incomplete combustion, hazardous gases produced may consist of:
carbon monoxide (CO)
carbon dioxide (CO2)
Combustion gases of organic materials must in principle be graded as inhalation poisons
Vapours are heavier than air and may spread along floors
Vapour/air-mixtures are explosive at intense warming

5.3. Advice for firefighters

**Special protective equipment for firefighters**
Fire fighter protection should include a self-contained breathing apparatus (NIOSH-approved or EN 133) and full fire-fighting turn out gear.

**Precautions for firefighting**
Keep people away from and upwind of fire. Cool containers / tanks with water spray. Dike and collect water used
to fight fire. Water run-off can cause environmental damage.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: For personal protective equipment see section 8. Avoid contact with skin and eyes. Avoid breathing vapors or mists. Keep people away from and upwind of spill/leak. Ensure adequate ventilation, especially in confined areas. Keep away from heat and sources of ignition.

For emergency responders: Personal protection see section 8.

6.2. Environmental precautions

Prevent further leakage or spillage. Do not discharge product into the aquatic environment without pretreatment (biological treatment plant). Water runoff can cause environmental damage.

6.3. Methods and material for containment and cleaning up

Methods for containment
Stop the flow of material, if possible without risk. Dike spilled material, where this is possible.

Methods for cleaning up
Soak up with inert absorbent material. Keep in suitable, closed containers for disposal. If liquid has been spilt in large quantities clean up promptly by scoop or vacuum. Dispose of in accordance with local regulations. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours).

6.4. Reference to other sections

For personal protective equipment see section 8.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Further info may be available in the appropriate Exposure scenarios in the annex to this SDS.

Advice on safe handling
Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product. Provide sufficient air exchange and/or exhaust in work rooms.

Hygiene measures
When using, do not eat, drink or smoke. Take off all contaminated clothing immediately. Wash hands before breaks and immediately after handling the product.

Advice on the protection of the environment
See Section 8: Environmental exposure controls.

Incompatible products
bases
amines
strong oxidizing agents
reducing agents

7.2. Conditions for safe storage, including any incompatibilities
SAFETY DATA SHEET

Pelargonic acid
10560

Advice on protection against fire and explosion
Keep away from sources of ignition - No smoking. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). In case of fire, emergency cooling with water spray should be available. Ground and bond containers when transferring material. Vapour/air-mixtures are explosive at intense warming.

Technical measures/Storage conditions
Keep containers tightly closed in a cool, well-ventilated place. Handle and open container with care. Keep at temperatures between 16 and 40 °C (60 and 104 °F).

Temperature class
T2

7.3. Specific end use(s)
Distribution of substance
Formulation
cleaning agent
Lubricants and lubricant additives
Intermediate
laboratory chemicals
Industrial processing of articles
For specific end use information see the annex of this safety data sheet

SECTION 8: Exposure controls / personal protection

8.1. Control parameters
Exposure limits European Union
No exposure limits established.

Exposure limits UK
No exposure limits established.

Environment

PNEC aqua - freshwater 0,36 mg/l
PNEC aqua - marine water 0,036 mg/l
PNEC aqua - intermittent releases 0,6 mg/l
PNEC STP 1,4 mg/l
PNEC sediment - freshwater 8,5 mg/kg
PNEC sediment - marine water 0,85 mg/kg
PNEC Air No hazard identified
PNEC soil 1,48 mg/kg
Secondary poisoning
No potential for bioaccumulation

8.2. Exposure controls

Special adaptations (REACH)
Not applicable.

Appropriate Engineering controls
General or dilution ventilation is frequently insufficient as the sole means of controlling employee exposure. Local ventilation is usually preferred. Explosion-proof equipment (for example fans, switches, and grounded ducts) should be used in mechanical ventilation systems.

Personal protective equipment

General industrial hygiene practice
Avoid contact with skin, eyes and clothing. Do not breathe vapours or spray mist. Ensure that eyewash stations and safety showers are close to the workstation location.

Hygiene measures
SAFETY DATA SHEET

Pelargonic acid
10560

When using, do not eat, drink or smoke. Take off all contaminated clothing immediately. Wash hands before breaks and immediately after handling the product.

Eye protection
Tightly fitting safety goggles. In addition to goggles, wear a face shield if there is a reasonable chance for splash to the face.
Equipment should conform to EN 166

Hand protection
Wear protective gloves. Recommendations are listed below. Other protective material may be used, depending on the situation, if adequate degradation and permeation data is available. If other chemicals are used in conjunction with this chemical, material selection should be based on protection for all chemicals present.

Suitable material: nitrile rubber
Evaluation: according to EN 374: level 6
Glove thickness: approx 0.55 mm
Break through time: > 480 min

Suitable material: polyvinylchloride / nitrile rubber
Evaluation: according to EN 374: level 6
Glove thickness: approx 0.9 mm
Break through time: > 480 min

Skin and body protection
Impervious clothing. Wear face-shield and protective suit for abnormal processing problems.

Environmental exposure controls
If possible use in closed systems. If leakage can not be prevented, the substance needs to be suck off at the emersion point, if possible without danger. Observe the exposure limits, clean exhaust air if needed. If recycling is not practicable, dispose of in compliance with local regulations. Inform the responsible authorities in case of leakage into the atmosphere, or of entry into waterways, soil or drains.

Additional advice
Further details on substance data can be found in the registration dossier under the following link: http://echa.europa.eu/information-on-chemicals/registered-substances. For specific exposure controls see the annex to this safety data sheet.

Explosive properties Does not apply, substance is not explosive. There are no chemical groups associated with explosive properties

Oxidizing properties Does not apply, substance is not oxidising. There are no chemical groups associated with oxidizing properties

9.2. Other information

Molecular weight 158.23

Molecular formula C9 H18 O2

Refractive index 1,433 @ 20 °C

Surface tension 31,7 mN/m (0,27 g/l @ 20°C (68°F)), OECD 115

SECTION 10: Stability and Reactivity

10.1. Reactivity

The reactivity of the product corresponds to the typical reactivity shown by the substance group as described in any text book on organic chemistry.

10.2. Chemical stability

Stable under recommended storage conditions.

10.3. Possibility of hazardous reactions

Hazardous polymerisation does not occur.

10.4. Conditions to avoid

Avoid contact with heat, sparks, open flame and static discharge. Avoid any source of ignition.

10.5. Incompatible materials

bases, amines, strong oxidizing agents, reducing agents.
10.6. Hazardous decomposition products
No decomposition if stored and applied as directed.

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Likely routes of exposure: Ingestion, Inhalation, Eye contact, Skin contact

### Acute toxicity

12.5. Results of PBT and vPvB assessment

Pelargonic acid, CAS: 112-05-0
PBT and vPvB assessment
This substance is not considered to be persistent, bioaccumulating nor toxic (PBT), nor very persistent nor very bioaccumulating (vPvB)

12.6. Other adverse effects

Pelargonic acid, CAS: 112-05-0
No data available

Note
Avoid release to the environment.***

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Product Information
Disposal required in compliance with all waste management related state and local regulations. The choice of the appropriate method of disposal depends on the product composition by the time of disposal as well as the local statutes and possibilities for disposal.
Hazardous waste according to European Waste Catalogue (EWC)

Uncleaned empty packaging
Contaminated packaging should be emptied as far as possible and after appropriate cleansing may be taken for reuse.

National regulatory information Great Britain
15.2. Chemical safety assessment

The Chemical Safety Report (CSR) has been generated. For Exposure Scenarios see the annex.

**SECTION 16: Other information**

Full text of H-Statements referred to under sections 2 and 3
H315: Causes skin irritation.
H319: Causes serious eye irritation.
H412: Harmful to aquatic life with long lasting effects.

Abbreviations
A table of terms and abbreviations can be found under the following link:

Training advice
For effective first-aid, special training / education is needed.

Sources of key data used to compile the datasheet
Information contained in this safety data sheet is based on Oxea owned data and public sources deemed valid or acceptable. The absence of data elements required by OSHA, ANSI or Annex II, Regulation 1907/2006/EC indicates, that no data meeting these requirements is available.

Further information for the safety data sheet
Changes against the previous version are marked by ***. Observe national and local legal requirements. For more information, other material safety data sheets or technical data sheets please consult the Oxea homepage (www.oxea-chemicals.com).

Disclaimer
For industrial use only. The information contained herein is accurate to the best of our knowledge. We do not suggest or guarantee that any hazards listed herein are the only ones which exist. Oxea makes no warranty of any kind, express or implied, concerning the safe use of this material in your process or in combination with other substances. User has the sole responsibility to determine the suitability of the materials for any use and the manner of use contemplated. User must meet all applicable safety and health standards.

End of Safety Data Sheet

Exposure scenario identification

1. Formulation & (re)packing of substances and mixtures
2. Use in Cleaning Products
3. Use in Cleaning Products
4. Lubricants
5. Lubricants
6. Industrial use resulting in manufacture of another substance (use of intermediates)
7. Use in laboratories
8. Industrial processing of articles
9. Industrial processing of articles
10. Industrial processing of articles

Number of the ES 1

Short title of the exposure scenario
Formulation & (re)packing of substances and mixtures

List of use descriptors

Sector of uses [SU]
SU10: Formulation [mixing] of preparations and/or re-packaging (excluding alloys)

Process categories [PROC]
PROC1: Use in closed process, no likelihood of exposure
PROC2: Use in closed, continuous process with occasional controlled exposure
PROC3: Use in closed batch process (synthesis or formulation)
PROC4: Use in batch and other process (synthesis) where opportunity for exposure arises
PROC5: Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact)
PROC8a: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non-dedicated facilities
PROC8b: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities
PROC9: Transfer of substance or preparation into small containers (dedicated filling line, including weighing)
PROC13: Treatment of articles by dipping and pouring
PROC14: Production of preparations or articles by tablettion, compression, extrusion, pelettisation
PROC15: Use as laboratory reagent

Environmental release categories [ERC]
ERC2: Formulation of preparations (mixtures)

Product characteristics
Refer to attached safety data sheets

Processes and activities covered by the exposure scenario
Formulation, packing and re-packing of the substance and its mixtures in batch or continuous operations, including storage, materials transfers, mixing, tablettion, compression, pelettisation, extrusion, large and small scale packing, sampling, maintenance and associated laboratory activities.

Further explanations
Industrial use
Human health hazard assessment:
For concentrations below 10 %, the mixture is not hazardous with respect to the substance, no RMM/OCs are necessary.

### Contributing Scenarios

**Further specification**

Chesar 2.2, release factors for (Sp)ERC were modified.

**Product characteristics**

Covers percentage substance in the product up to 100 % (unless stated differently).

**Amounts used**

- Daily amount per site: 2 to
- Annual amount per site: 200 to
- Fraction of Regional tonnage used locally: 1

**Environment factors not influenced by risk management**

- River flow rate: 18000 m³/d
- Local freshwater dilution factor: 10
- Local marine water dilution factor: 100

**Other given operational conditions affecting environmental exposure**

- Indoor/Outdoor use
- Technical conditions and measures at process level (source) to prevent release
  - Release fraction to air from process: 2.5 %
  - Release fraction to wastewater from process: 0.9 %
  - Release fraction to soil from process: 0.01 %
- Conditions and measures related to municipal sewage treatment plant
  - Size of municipal sewage system/ treatment plant (m³/d): 2000
  - The minimum grade of elimination in the sewage plant is (%): 87.5
- Conditions and measures related to external treatment of waste for disposal
  - none
- Conditions and measures related to external recovery of waste
  - none

</table>

**Further specification**

Qualitative approach used to conclude safe use.

**Product characteristics**

Covers percentage substance in the product: >=10 %

**Frequency and duration of use**

- 8 h (full shift)

**Other given operational conditions affecting workers exposure**

- Indoor and outdoor use
- Organisational measures to prevent /limit releases, dispersion and exposure
  - Regular cleaning of equipment and work area
  - Supervision in place to check that the RMMs in place are being used correctly and OCs followed.
  - Training for staff on good practice
  - Good standard of personal hygiene
  - Minimization of manual phases
  - Work procedures minimizing of splashes and spills
  - Avoidance of contact with contaminated tools and objects
- Conditions and measures related to personal protection, hygiene and health evaluation
  - Full skin coverage with appropriate light-weight barrier material. Wear suitable gloves (tested to EN374) and eye protection.
SAFETY DATA SHEET

Pelargonic acid
10560

Version / Revision 4.01

Exposure estimation and reference to its source

Environment
Environment PEC = predicted environmental concentration (local); RCR = risk characterisation ratio

- Fresh Water (Pelagic) PEC: 0.113 mg/l; RCR: 0.313
- Fresh Water (Sediment) PEC: 1.593 mg/kg dw; RCR: 0.187
- Marine Water (Pelagic) PEC: 0.011 mg/l; RCR: 0.313
- Marine Water (Sediment) PEC: 0.159 mg/kg dw; RCR: 0.187
- Agricultural Soil PEC: 0.255 mg/kg dw; RCR: 0.173
- Sewage Treatment Plant (Effluent) PEC: 1.128 mg/l; RCR: 0.806

Guidance to Downstream User to evaluate whether he works inside the boundaries set by the ES
Usage of release factors allows downstream users to verify in a first approximation, if the combination of local usage and production conditions meets the defined release quantities resulting from this exposure scenario (calculated as M(site) [see amounts used, contributing scenario 1] x release factor [Technical conditions and measures at process level (source) to prevent release; contributing scenario 1])

associated uses:
Should consumer uses be associated with this exposure scenario, please contact Oxea for further details
Other combinations of operational conditions may also be safe. Please contact Oxea in case your local operational conditions differ from the ones described above and you are unsure if they are also safe

Number of the ES 2

Use in Cleaning Products

List of use descriptors

Sector of uses [SU]
SU3: Industrial uses: Uses of substances as such or in preparations at industrial sites

Process categories [PROC]
PROC1: Use in closed process, no likelihood of exposure

Sector of uses [SU]
SU8: Manufacture of bulk, large scale chemicals (including petroleum products)
SU9: Manufacture of fine chemicals
SU3: Industrial uses: Uses of substances as such or in preparations at industrial sites
SAFETY DATA SHEET

Pelargonic acid
10560

Version / Revision 4.01

Process categories [PROC]
PROC1: Use in closed process, no likelihood of exposure
PROC2: Use in closed, continuous process with occasional controlled exposure
PROC3: Use in closed batch process (synthesis or formulation)
PROC4: Use in batch and other process (synthesis) where opportunity for exposure arises
PROC8a: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non-dedicated facilities
PROC8b: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities
PROC9: Transfer of substance or preparation into small containers (dedicated filling line, including weighing)
PROC15: Use as laboratory reagent

Environmental release categories [ERC]
ERC6a: Industrial use resulting in manufacture of another substance (use of intermediates)

Product characteristics
Refer to attached safety data sheets

Processes and activities covered by the exposure scenario
Use as an intermediate (not related to Strictly Controlled Conditions). Includes incidental exposures during recycling/recovery, material transfers, storage, sampling, associated laboratory activities, maintenance and loading (including marine vessel/barge, road/rail car and bulk container).

Further explanations
Industrial use
Human health hazard assessment:
For concentrations below 10%, the mixture is not hazardous with respect to the substance, no RMM/OCs are necessary

Contributing Scenarios

<table>

</thead>
<tbody>
<tr>
<td>Contributing exposure scenario controlling environmental exposure for ERC 6a</td>
<td></td>
</tr>
</tbody>
</table>

Further specification
assessment tool used: Chesar 2.2, release factors for (Sp)ERC were modified.

Product characteristics
Covers percentage substance in the product up to 100% (unless stated differently).

Amounts used
Daily amount per site: 5 to
Annual amount per site: 100 to
Fraction of Regional tonnage used locally: 1

Environment factors not influenced by risk management
River flow rate: 18000 m³/d Local freshwater dilution factor: 10 Local marine water dilution factor: 100

Other given operational conditions affecting environmental exposure
Indoor/Outdoor use

Technical conditions and measures at process level (source) to prevent release
Release fraction to air from process: 5 %
Release fraction to wastewater from process: 0.3 %
Release fraction to soil from process: 0.1%

Conditions and measures related to municipal sewage treatment plant
Size of municipal sewage system/ treatment plant (m³/d): 2000
The minimum grade of elimination in the sewage plant is (%): 87.5

Conditions and measures related to external treatment of waste for disposal
None

Conditions and measures related to external recovery of waste
None

| Number of the contributing scenario | 2 |
SAFETY DATA SHEET

Pelargonic acid
10560

Version / Revision 4.01

Contributing exposure scenario controlling worker exposure for
PROC 1, PROC 2, PROC 3, PROC 4, PROC 8a, PROC 8b, PROC 9, PROC 15

Further specification
Qualitative approach used to conclude safe use.

Product characteristics
Covers percentage substance in the product: >=10 %

Frequency and duration of use
8 h (full shift)

Other given operational conditions affecting workers exposure
Indoor and outdoor use

Organisational measures to prevent /limit releases, dispersion and exposure
Regular cleaning of equipment and work area
Training for staff on good practice
Good standard of personal hygiene
Minimization of manual phases
Work procedures minimizing of splashes and spills
Avoidance of contact with contaminated tools and objects

Conditions and measures related to personal protection, hygiene and health evaluation
Wear suitable gloves (tested to EN374) and eye protection. Full skin coverage with appropriate light-weight barrier material.

Exposure estimation and reference to its source

Environment
Environment PEC = predicted environmental concentration (local); RCR = risk characterisation ratio
Fresh Water (Pelagic) PEC: 0.094 mg/l; RCR: 0.261
Fresh Water (Sediment) PEC: 1.33 mg/kg dw; RCR: 0.156
Marine Water (Pelagic) PEC: 0.009 mg/l; RCR: 0.261
Marine Water (Sediment) PEC: 0.133 mg/kg dw; RCR: 0.156
Agricultural Soil PEC: 0.213 mg/kg dw; RCR: 0.144
Sewage Treatment Plant (Effluent) PEC: 0.94 mg/l; RCR: 0.672

Guidance to Downstream User to evaluate whether he works inside the boundaries set by the ES
Usage of release factors allows downstream users to verify in a first approximation, if the combination of local usage and production conditions meets the defined release quantities resulting from this exposure scenario (calculated as M(site) [see amounts used, contributing scenario 1] x release factor [Technical conditions and measures at process level (source) to prevent release; contributing scenario 1]) associated uses:
Should consumer uses be associated with this exposure scenario, please contact Oxea for further details
Other combinations of operational conditions may also be safe. Please contact Oxea in case your local operational conditions differ from the ones described above and you are unsure if they are also safe

Number of the ES 7
Short title of the exposure scenario
