

WITHOUT US, NOTHING WORKS WELL.
ALMOST NOTHING.

We have as little to do with the fascination for Formula 1 racing as we have over the wonderful feelings you experience at a great concert. However – you will often find OXEA products in the fuel for racing cars, in car body paints, in the many plastics used in sound engineering, and in DVD and Blu-ray discs. OXEA is one of the world's largest manufacturers of Oxo products and is Number 1 in the Merchant Market. We are economically sound and continually growing – with a strong environmentally green conscience and a respect for cultural values. With approximately 1400 employees worldwide, we offer a working environment with a streamlined hierarchy which provides a wide variety of responsibilities that will challenge you professionally and provide opportunities to advance your career development.

Senior Project Engineer

Bay City, Texas

Provide engineering design, costs, plans, and specifications for construction of new facilities and reconditioning or altering of existing systems and equipment. Provide discipline-specific services for the plant, working closely with other departments to define the scope, urgency, and schedule of assigned work. May lead a major project or direct the design on major projects engineered at the plant or at a contractor's office.

Major activities and principal responsibilities: Defines scope, estimates costs, and provides detailed engineering design for plant additions and modifications, and coordinates engineering, design and drafting work done by others ◦ Reviews the work of, and provides guidance for, a contract engineering staff ◦ Provides technical expertise plus engineering consulting and troubleshooting services to the plant, and reviews project feasibilities and provides innovative uses of technology ◦ Assists in maintaining and updating plant standards, and may serve on a company standards committee ◦ Writes specifications for equipment/services, evaluates vendors' bids, selects equipment and approves purchase requisitions for their projects ◦ Prepares ARs and provides project cost control and management, and reports to management on project expenditures and provides information for economic forecasting

and capital planning ◦ Monitors progress of construction projects in the field, and checks for conformance to design and specifications, assisting in start-up as required

Minimum qualifications: BS degree in mechanical engineering from an accredited university or an engineering degree with applicable project engineering experience ◦ Five years of project engineering experience is required ◦ Computer use and applications ◦ Project estimating and scheduling ◦ Drafting/design techniques ◦ Effective oral and written communications skills

Desired qualifications: Ten or more years of project engineering experience ◦ Experience in leadership or operations ◦ Proficiency in several Plant Engineering activities

All candidates are invited to participate regardless of race, sex, age, color, national origin, marital status, religion, disability or veteran status and any other criterion prescribed by law.

This position requires that the applicant be authorized to work in the United States. If you feel you have the necessary skills and experience for this position, please email your resume to the following email address:
